I. Executive Summary

A Phase I Environmental Site Assessment (ESA) was performed on portions of certain parcels real property at approximately 1400 North Iron Springs Road, Cedar City, Utah 84720 referred to in this ESA as the Subject Property. This ESA has been prepared for the use of Commerce Crossroads Logistics Park LLC. Horrocks has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Practice E1527-21. Any exceptions to, or deletions from, this practice are described in Section II of this Report.

Based upon the information obtained in the preparation of this report, no Recognized Environmental Conditions (RECs) are believed to exist on the site.

II. Introduction

1. Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) is to identify Recognized Environmental Conditions (RECs) at the subject property as of the date of this document, for purposes of supporting the User's completion of the requirements for all appropriate inquiry.

2. Detailed Scope-of-Services

This ESA was conducted in general accordance with the consensus document known as ASTM E 1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Any significant scope-of-work additions, deletions, or deviations to ASTM Practice E1527-21 are noted below and/or in the corresponding sections of this Report.

The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils, and hydrologic data.
- History of the Subject Property through a review of referenced sources such as title work, fire insurance maps, city directories, aerial photographs, interviews, and prior reports, if any are available.
- Current site conditions for the Subject Property based on observations and interviews in relation to the potential presence of hazardous substances or petroleum products; generation, treatment, storage, and/or disposal of hazardous waste; equipment that utilizes oils which potentially contain PCBs, and storage tanks (above and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership of the Subject Property through a review of available prior reports and local municipal file reviews.

3. Assumptions, Limitations, and Exceptions

This ESA has been prepared for the use of Commerce Crossroads Logistics Park LLC as the User for the ESA ("User"), in accordance with the agreement in place with User as of the date of this ESA, and with the limitations described below, all of which are integral parts of this ESA. Horrocks has performed this ESA in general conformance with the scope and limitations of *ASTM Practice E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This ESA was prepared with no exceptions or deletions from ASTM Practice E1527-21.

This ESA has been prepared to assess a parcel of real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 USC §9601) and petroleum products. As such, this practice is intended to permit User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: this is, the practices that constitute "all appropriate inquire into the previous ownership and uses of the Project Site consistent with good commercial or customary practice: as defined in 42 USC §9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products even under conditions in compliance with law. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The information reported herein was obtained through sources deemed reasonably ascertainable, as defined in ASTM Practice E1257-21; a visual site reconnaissance survey of the Subject Property that were either readily observable and accessible (either through easy access or access provided by the Owner/Occupant), and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in this ESA are based on visual observations, review of records, and information provided by the User. Horrocks relies completely on the information, whether written, graphic, or verbal, that was provided to Horrocks by said sources and assumes that information to be true and correct. Horrocks did not attempt to independently verify the accuracy or

completeness of all information reviewed or received during the course of these environmental services.

The observations documented in this ESA are valid as of the date of the investigation. Where access to portions of the Subject Property or to any structures on the Subject Property was unavailable or limited, Horrocks renders a limited opinion based solely on the information obtained as part of this ESA as to the conditions for that portion of the Subject Property. In addition, Horrocks renders a limited opinion based solely on the information received where direct observation of portions of the interior of any structures was not readily available.

This ESA was performed in accordance with generally accepted practices of the profession, and Horrocks observed that degree of care and skill generally exercised by other consultants currently practicing in the same locality under similar circumstances and conditions. The standard of care shall be determined solely at the time the Services were rendered and not according to standards utilized at a later date. No other representation, express or implied, and no warranty or guarantee is included or intended, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose. User and Horrocks agree that to the fullest extent permitted by law, Horrocks shall not be liable to User for any special, indirect, or consequential damages whatsoever, whether caused by Horrocks' negligence, errors, omissions, strict liability, breach of contract, breach of warranty, or other cause(s) whatsoever.

The ASTM Practice E1527-21 does not encompass analytical testing to evaluate asbestos-containing materials, radon, lead-containing paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA.

This ESA did not include any inquiry or evaluation with respect to any non-scope considerations such as those referenced in Section 21 of the ASTM Standard or other services or potential conditions or features not specifically identified and discussed herein.

4. Special Terms and Conditions (User Reliance)

This Phase I Environmental Site Assessment (ESA) has been prepared to assist User and their professional advisors in its proposed commercial development of the Subject Property. This ESA can be relied upon by only the parties stated in the transmittal letter included in this ESA. Horrocks' liability to the user of this ESA is limited to the cost of the ESA. Amendments to Horrocks' limitations as stated herein that may occur after issuance of this ESA are considered to be included in this ESA.

5. Significant Data Gaps

Any data gaps identified herein, as defined by ASTM Practice E1527-21, Section 3.2.19 are not considered to have significantly affected the ability to identify RECs in connection with the Subject Property and do not alter the conclusions contained herein.

Interior observations were not able to be made on the western residential property due to lack of access. The northern portion of the Subject Property was not surveyed detail due to difficulty in access and poor weather conditions. All of the interviews were with people familiar with the Subject Property for only a relatively short period of time; however, the nature of the property indicates that there has been little change in its use during that time. None of these data gaps are believed to be significant.

III. Site Description

1. Ownership and Property Location

The Subject Property consists of six (6) of parcels of real property located at approximately 1400 North Iron Springs Road, Cedar City, Utah, 84720. The Subject Property is located west of Cedar City in Iron County and consists of approximately 825.9 acres. See the Project Location Map in Appendix 1.

According to title policies and interviews, and/or the Iron County Records' Office, the Subject Property is currently owned by Iron Apex Holdings LLC. Iron Apex Holdings LLC is a holding company that is affiliated with User for the development of the Subject Property. The Iron County Recorder's online parcel map indicates Parcel 2 as owned by Iron Farms LLC, which may not be the most current information. A Lot Line Adjustment was made on June 28, 2022 which adjusted the legal description for Parcels 1 and 2. The legal description/parcel numbers of the Subject Property are as follows:

Parcel 1: E-0144-0006-0000 (Referred to as E-0144-0004-0000 in title work) – 538.01 acres

Beginning at the Northwest corner of Section 34, Township 35 South, Range 12 West, SLB&M; thence S.88°55'46"E. along the section line 2653.47 feet to the North Quarter corner of said Section 34, thence S.88°55'40"E. along the section line 262.30 feet to the southwesterly right-of-way line of the L.A. & S.L. railroad, thence along the southwesterly right-of-way line the next 5 calls; (1) thence S.43°39'53"E. 3451.48 feet to the east line of said Section 34, (2) thence S.0°10'12"W. along said section line 144.39 feet, (3) thence S.43°39'53"E. 2607.50 feet, (4) thence N.46°20'07"E. 100.00 feet, (5) thence S.43°39'53"E. 246.75 feet, thence S.46°22'39"W. 925.36 feet, thence N.43°37'21"W. 2528.95 feet, thence S.46°22'39"W. 2682.55 feet to a point on the south line of said Section 34, thence N.89°37'28"W. along the section line 365.10 feet to the South Quarter corner of said Section 34, thence N.89°33'20"W. along the section line 1117.39 feet to the easterly right-of-way line of Iron Springs Road, thence along said easterly right-of-way line next 6 calls; (1) thence along the arc of a curve to the right with a radius of 5679.70 feet a distance of 1973.76 feet (the chord of said curve bears N.30°17'32"W. 1963.84 feet), (2) thence N.20°23'25"W. 329.48 feet, (3) thence along the arc of a curve to the left with a radius of 2914.90 feet a distance of 508.96 feet (the chord of said curve bears N.25°20'17"W. 508.31 feet), (4) thence N.30°17'49"W. 347.12 feet, (5) thence along the arc of a curve to the right with a radius of 1429.13 feet a distance of 621.00 feet (the chord of said curve bears N.17°21'22"W. 616.12 feet), (6) thence N.4°54'37"W. 1978.85 feet to the north line of Section 33, Township 35 South, Range 12 West, SLB&M, thence N.87°28'53"E. along said section line 349.61 feet to the point of beginning.

CONTAINS 538.01 ACRES OF LAND.
SUBJECT TO EXISTING EASEMENTS OF RECORD.

Parcel 2: E-0136-0009-0000 *Referred to as E-0144-00R1-0000 in title work) – 227.53 acres

Beginning at a point located S.89°37'28"E. along the section line 1335.34 feet from the South Quarter corner of Section 34, Township 35 South, Range 12 West, SLB&M; thence N.0°16'04"E. 295.16 feet, thence N.89°37'28"W. 295.16 feet, thence S.0°16'04"W. 295.16 feet to a point on said section line, thence N.89°37'28"W. along the section line 675.09 feet, thence N.46°22'39"E. 2682.55 feet, thence S.43°37'21"E. 2528.95 feet, thence N.46°22'39"E. 925.36 feet to the southwesterly right-of-way line of the L.A. & S.L. railroad, thence S.43°39'53"E. along said southwesterly right-of-way line 2726.72 feet, thence N.89°44'37"W. 1321.27 feet, thence N.89°45'32"W. 2673.93 feet, thence N.89°45'17"W. 1338.66 feet, thence N.0°38'06"W. 1285.42 feet to the south line of said Section 34, thence S.89°37'28"E. along said section line 79.16 feet to the point of beginning.

CONTAINS 227.53 ACRES OF LAND.

SUBJECT TO EXISTING EASEMENTS OF RECORD.

Parcel 3: E-0172-0001-0000 – 20.04 acres

Beginning at a point South 89°30'15" East along the Township line 815.81 feet (815.18 feet as shown on that Record of Survey for: Mountain View Real Estate, prepared by Adams Surveying and Engineering, filed September 14, 1992, as Plat No. 274, in the Office of the County Engineer of Iron County, Utah) from the South Quarter corner of Section 34, Township 35 South, Range 12 West, Salt Lake Base and Meridian; said point being also South 89°29'54" East 900.32 feet from the North Quarter Corner of Section 3, Township 36 South, Range 12 West, Salt Lake Base and Meridian; and running thence South 89°30'15" East along said Township line 441.09 feet to the Northeast Corner of Sectional Lot 2, Section 3, Township 36 South, Range 12 West, Salt Lake Base and Meridian; thence South 0°31'02" East along the 1/16 Section line 2204.39 feet to the Center line of an existing 100.00 foot Right of Way for a County Road; thence North 49°11'38" West along said centerline 609.00 feet; thence North 1810.14 feet to the point of beginning.

EXCEPTING THEREFROM any portion lying with the boundaries of the County Road Right of Way (Highway U-235).

EXCEPTING THEREFROM any and all water and/or water rights.

Parcel 4: E-0172-0001-0001 – 20.01 acres

Beginning at the North quarter corner of Section 3, Township 36 South, Range 12 West, Salt Lake Base and Meridian, and running thence South 89°26'28" East 85.14 feet to the South quarter corner of Section 34, Township 35 South, Range 12 West, Salt Lake Base and Meridian, thence South 89°30'15" East 237.31 feet, thence South 1135.19 feet, thence North 62°22'28" West 381.74 feet to the North right of way line of an existing County Road, thence North 49° 11'38" West along the said right of way 510.05 feet to the P.C. of a curve to the right, (curve data : Delta Angle 9°03'20", Radius 5679.70 feet, Tangent 449.77 feet, Length 897.67 feet), thence along the arc of said curve 897.67 feet to a point on the Township line, thence South 89°26'28" East 1032.25 feet to the point of beginning.

EXCEPTING THEREFROM any and all water and/or water rights.

Parcel 5: E-0172-0001-0002 – 19.86 acres

Beginning at a point South 89°20'15" East along the Township line 237.31 feet from the South quarter corner of Section 34, Township 35 South, Range 12 West, Salt Lake Base and Meridian; said point being also South 89°29'15" East 322.45 feet from the North quarter corner of Section 3, Township 36 South, Range 12 West, Salt Lake Base and Meridian; running thence South 89°30'15" East along said Township line 577.87 feet; thence South 1810.14 feet to the centerline of an existing 100 feet wide right of way for a county road; thence North 49°11'29" West along said centerline 763.42 feet; thence North 1316.25 feet to the point of beginning.

EXCEPTING THEREFROM that portion lying within the boundaries of the county road right-of-way

Parcel 6: E-0172-0001-0003 – 0.45 acres

Beginning at a point South 00°56'28" West, 961.20 feet from the North Quarter corner of Section 3, Township 36 South, Range 12 West, Salt Lake Base and Meridian; and running thence South 62°22'28" East 381.74 feet; thence South 115.00 feet to a point on the North right-of-way line of an existing County Road; thence North 49°11'38" West along said Right-of-Way line 446.84 feet to the point of beginning.

2. Current Use of the Subject Property

The Subject Property currently consists of mostly undeveloped land, with some agricultural and limited residential use.

3. Subject Property Site Improvements

a. Descriptions of Structures, Roads and Other Improvements on the Subject Property

The Subject Property includes two residential structures in the southern portion of the property, each on approximately 20-acre lots, with multiple smaller structures and/or outbuildings associated with the two residential structures and with an agricultural area.

The structures are accessed by several dirt roads, namely 6430 West which branches off Iron Springs Road and loops around to reconnect with Iron Springs Road, and some unnamed dirt access roads, driveways. There are also a couple of other dirt roads, namely, 6300 West (which bisects the Subject Property around the center of the property in a north-south orientation), 1400 North (which runs along the southern border in an east-west direction that connects to Iron Springs Road), and Iron Springs Road (which runs along the western edge of the property in a northwest-southeast diagonal direction). There are also several dirt roads that cross the property for access to portions of the property currently in use for agricultural purposes.

The agricultural operation includes an irrigation pivot sprinkler, livestock pens, and a haystack, as well as dirt access roads to the agricultural fields.

The eastern section of the Subject Property is bounded by the Union Pacific Railroad (UPRR) tracks that run diagonally in a northwestern-southeastern direction. There are overhead utility lines that provide power to the residences.

b. Municipal Services and Utilities

The Subject Property is served by the municipal services and utilities listed in Table 1.

Table 1. Municipal Services and Utilities for Subject Property

Utility	Provider
Potable Water Supply	Existing Central Iron County Water Conservancy District water system along the eastern, southern, and most of the western boundary of the Subject Property (along the UPRR line on the east and along Iron Springs Road on the west). Proposed for future Cedar City service.
Sewage Disposal System	No known existing sanitary sewer. Proposed for Cedar City to provide sanitary sewer service for the Subject Property. Inquiries with the Southwest Utah Public Health Department revealed no records of septic systems for the Subject Property; however, according to interviews, the two houses on certain parcels as part of the Subject Property use septic systems.
Electrical Service	Existing Rocky Mountain Power overhead lines run along the northern and northeastern border of the Subject Property and also along Iron Springs Road on the west.
Natural Gas Service	Gas services provided by Blackburn. There is also an existing Dominion Energy 8-inch high-pressure gas mainline along Iron Springs Road on the west.
Storm Water Service	No known existing storm water service. Proposed for future service from Cedar City.
Telecommunications	Existing Century Link System conduit along Iron Springs Road.

4. Adjoining Properties

Property use in the vicinity of the Subject Property is primarily undeveloped or agricultural in nature, especially to the south and east. There is a residential neighborhood to the southwest of the Subject Property and some industrial usage south of the Subject Property, including a pipe foundry, a copper tube business, and a turf farm. There is also a large solar farm to the northeast. See Table 2 for the Adjoining Properties.

Table 2. Current Uses of Adjoining Properties

Adjoining Properties	
North	Undeveloped
South	Agricultural/undeveloped in the southeast; residential in the southwest
East	Undeveloped
West	Undeveloped in the northwest; residential in the southwest

No visual evidence of adverse environmental conditions was observed during the overview survey of the adjoining properties.

IV. User Provided Information

1. Title Records

Five (5) title insurance policies were obtained from User for the parcels constituting the Subject Property:

- **Parcels 1 and 2:** ALTA Owner's Policy of Title Insurance issued by Stewart Title Guaranty Company (File No. 13493) dated September 1, 2021, issued to Iron Apex Holdings, LLC a Utah Limited Liability Company.
- **Parcel 4:** ALTA Owner's Policy of Title Insurance issued by Stewart Title Guaranty Company (File No. 13850-00001) dated November 17, 2021, issued to Iron Apex Holdings, LLC, a Utah Limited liability company.
- **Parcel 3:** ALTA Owner's Policy of Title Insurance issued by Stewart Title Guaranty Company (File No. 14447-000001) dated April 8, 2022, issues to Iron Apex Holdings, LLC a Utah Limited Liability Company.
- **Parcel 5:** ALTA Owner's Policy of Title Insurance issued by Stewart Title Guaranty Company (File No. 15046-000001) dated August 12, 2022, issued to Iron Apex Holdings, LLC a Utah Limited Liability Company.
- **Parcel 6:** ALTA Owner's Policy of Title Insurance issued by Stewart Title Guaranty Company (File No. 15335-000001) dated February 7, 2023, issued to Iron Apex Holdings, LLC a Utah Limited Liability Company.

There were no environmental liens or activity and use limitations identified in the title records. Uses and users identifiable in this information are consistent with other information and findings presented in this assessment, and do not indicate that RECs are present.

2. Environmental Liens or Activity and Use Limitations

An environmental lien search outside of the title records referenced above was not conducted as part of this report. No environmental liens or activity and use limitations have been identified for the subject property in the title records.

3. Specialized Knowledge

Interviews were conducted with Ryan Obray, as a representative of User, as well as a prior occupant of one of the residential properties (Shem Jessop) and a current lessee who uses the property for agricultural production (Devar Bulloch). Messages were left for an additional prior occupant, but no contact was able to be made (Jason Brewer). There are additional current occupants that are leasing the two residences that were only contacted in connection with the site visit (no names were obtained for the two short-term lessees). Summaries of the interviews are included in Section VII.

No interviewees indicated that they were aware of any environmental restrictions against the property, or of any issues with potential environmental contamination. There was no information otherwise discovered in these interviews that would indicate environmental conditions of concern at the subject property as of this date.

4. Commonly Known or Reasonable Ascertainable Information

A GRAMA request was submitted to the Southwest Utah Public Health Department, which covers Iron County where the Subject Property is located. Additionally, a search of the Utah Department of Environmental Quality (DEQ) interactive map identified an additional LUST site; KSUB Transmitter/SO. Utah Broadcasting within 1 mile of the Subject Property. The LUST site was closed on 3/14/1996.

5. Valuation Reduction for Environmental Issues

From the interview with the agent for the User, the purchase price for parcel that constitute the Subject Property reflected the fair market value of the property. Based upon this representation from User, there is no indication of any undue reduction in the value of the property.

6. Owner, Property Manager, and Occupant Information

According to the Iron County Recorder's office, the Subject Property is currently owned by Iron Apex Holdings LLC (Parcels 1 and 3-6) and Iron Farms LLC for Parcel 2. Commerce Crossroads Logistics Park LLC is the developer and the User for the purposes of this ESA. Ryan Obray with Building Zone Industries is acting as the agent for the User for the purposes of the proposed development of the Subject Property.

A portion of the Subject Property in the southeastern section is currently leased for agricultural production by Devar Bulloch. There are also two residences on two separate parcels: Parcels E-0172-0001-0000 (previously occupied by Shem Jessop) and E-0172-0001-0002 (previously occupied by Jason Brewer). The two residences are currently occupied by short-term lessees that moved in recently. No names were provided for these short-term lessees.

7. Reason for Performing Phase I

This Phase I ESA is being performed as part of a development agreement.

V. Records Review

1. Standard Environmental Record Sources

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) on February 8, 2023. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Practice E1527-21, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. Orphan sites are those facilities that could not be automatically mapped or geocoded due to inadequate location information. The database report is located in Appendix 2.

Table 3 provides a summary of the findings of the environmental database report. Specific properties identified within the database report, if any, are discussed further below.

Table 3. Summary of Federal, State, and Tribal Agency Database Findings

Regulatory Database	Minimum Search Distance	Parcel Listings	Off-site Listing
Federal NPL Sites	1.0 mile	0	0
Federal Delisted NPL Sites	0.5 mile	0	0
Federal CERCLIS Sites	0.5 mile	0	0
Federal CERCLIS NFRAP Sites	0.5 mile	0	0
Federal RCRA CORRACTS Sites	1.0 mile	0	0
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	0	0
Federal RCRA Generators Sites	Property/Adjoining	0	0
Federal Engineering/Institutional Control Sites	0.5 mile	0	0
Federal ERNS Sites	Property	0	0
FINDS	Property	0	0
State and Tribal equivalent NPL/CERCLIS Sites	1.0 mile	0	0
State Spills	Property	0	0
State/Tribal Landfill & Solid Waste Disposal Sites	0.5 mile	0	0
State/Tribal Leaking Storage Tank Sites	0.5 mile	0	0
State/Tribal Registered Storage Tank Sites	Property/Adjoining	0	0
State/Tribal Engineering/Institutional Control Sites	0.5 mile	0	0
State/Tribal Voluntary Cleanup Sites	0.5 mile	0	0
State/Tribal Brownfield Sites	0.5 mile	0	0

No mapped sites were found in EDR's search of available ("reasonably ascertainable") government records, within the search radius around the subject property. The search radius met or exceeded the minimum search distance as outlined in ASTM E 1527-21.

EDR's record retrieval report also found 14 "orphan" sites that were not mappable. At least one (1) of the sites was listed twice, so of the 13 orphan sites, ten (10) sites were located outside of the one-mile radius of the Subject Property. The remaining three sites were unable to be located. Two of those sites were identified as SPILLS sites, with no further information provided. The final site (which is also the duplicate listing) was identified as FL72 AC MITIGATION PROJECT. A search of the Utah Department of Environmental Quality (DEQ) interactive map did not reveal any of those sites but did identify an additional LUST site; KSUB Transmitter/SO. Utah Broadcasting within 1 mile of the Subject Property. The LUST site was closed on 3/14/1996. The FL72 AC Mitigation Project is unlikely to result in any concerns about potential contamination on the Subject Property. No further information was able to be obtained on the two SPILLS sites.

There are 17 Federal database wells and 196 State database wells on or within a close proximity of the Subject Property, based on the database search. For the Subject Property, 17 of those State wells are located on the Subject Property, with one (1) Federal well located on a parcel inside of the Subject Property boundaries that is not part of the Subject Property. There is also a Public Water Supply System Information well in proximity to the Subject Property that has had major violation(s) or enforcement. Said well is at the same or lower elevation as the Subject Property.

Based on various mitigating factors including intervening distance, estimated ground water flow, regulatory case status, the medium impacted, etc., Horrocks did not identify within the regulatory

database review the Subject Property or any properties within the applicable search radii which would be suspected of adversely impacting the Subject Property.

2. Historical Use Sources

Horrocks researched the historic usage of the Subject Property and the surrounding area dating back to 1940 or to the first developed use. To determine the historic use, Horrocks relies on the ASTM designated standard historical sources, which may include aerial photographs, USGS topographical maps, fire insurance maps, property tax files, recorded land title records, street directories, zoning/land use records, building department records, interviews, and/or other historical sources.

a. Topography

Historic topographic mapping information was obtained for the subject site and surrounding area (Appendix 3). Available coverage was temporally intermittent, and of inconsistent scale (resolution). A review of the available USGS topographic mapping for the subject property indicated uses consistent with other information obtained for this assessment and did not indicate the presence of recognized environmental conditions on the subject property.

Seven quad maps covering the subject property area were obtained (Iron Springs 1906, Cedar City NW 1949, 1950, 1978, 2014, 2017, and 2020) and were used in this review. There are gaps between 1950 and 1978, and from 1978 to 2014; however, in light of the lack of changes or alterations in the Subject Property area in the in-between timeframes, these topographical maps provide a providing reasonably good representation of the historic use of the site.

b. Aerial

Historical aerial photographs of the subject site and surrounding area were also obtained dating back to 1946 (Appendix 3). Available coverage was both spatially and temporally intermittent, and of inconsistent scale (resolution). A review of the available aerial mapping for the subject property indicated uses consistent with other information obtained for this assessment and did not indicate the presence of recognized environmental conditions on the subject property.

Eleven aerial mapping periods (1948, 1952, 1960, 1967, 1977, 1984, 1993, 2006, 2011, 2014, 2018) were used in this review, providing reasonably good representation of the historic use of the site.

c. Fire Insurance Maps

No Fire Insurance (Sanborn) maps were obtained as part of this ESA due to the rural nature of the Subject Property, both historical and present, and the understanding that there were no Fire Insurance Maps available for this area.

d. Street Directories

No street directories were obtained as part of this ESA due to the rural nature of the Subject Property, both historical and present.

e. Recorded Land Title Records

Five (5) title insurance policies for the Subject Property were issued by Stewart Title Guaranty Company. The results were discussed in Section IV Subsection 1 above.

f. Property Tax Records

The Iron County Records' Office online parcel map was reviewed for parcel numbers and tax information.

- **Parcel 1:** no taxable value types
- **Parcel 2:** no taxable value types
- **Parcel 3:** Market (2022) \$370.896, Taxable \$370,890 (Tax area 10 Rate 0.008212)
- **Parcel 4:** Market (2022) \$55,025, Taxable \$55,025 (Tax area 10 Rate 0.008212)
- **Parcel 5:** Market (2022) \$377,927, Taxable \$133,675 (Tax area 10 Rate 0.008212)
- **Parcel 6:** Market (2022) \$1,125, Taxable \$1,125 (Tax area 10 Rate 0.008212)

g. Building Department Records

Due to the nature of the structures on the Subject Property, (mobile homes and small sheds/outbuildings), no building department records were searched.

h. Zoning/Land Use Records

Iron County zoning records were reviewed online. The Subject Property is currently zoned as Agricultural (20), Industrial, and Light Industrial, with the Industrial and Light Industrial zones both having been approved 9/26/02022.

i. Previous Environmental Reports

Horrocks was not provided with or made aware of previous environmental assessments or other documentation regarding environmental investigations performed for the Subject Property.

j. Additional Environmental Sources

Horrocks also reviewed the Utah Department of Environmental Quality (DEQ) interactive map, as indicated above.

3. Historical Use Information on the Subject Property and Adjoining Properties

Based on Horrocks' review of the historical information obtained as a part of this ESA, Horrocks did not identify any adverse environmental conditions associated with the Subject Property or the adjoining properties. Table 4 summarizes the findings of the historical usage research.

Table 4. Historical Use Summary

Period	Historical Uses		Sources
	Subject Property	Adjoining Properties	
1906-1950	Undeveloped	Undeveloped	Topos, Aerials
1950-1980	Undeveloped	Undeveloped/residential	Topos, Aerials
1980-2014	Undeveloped	Undeveloped/residential/agricultural	Topos, Aerials
2014-2023	Undeveloped	Undeveloped/residential/agricultural	Topos, Aerials

VI. Site Reconnaissance

1. Methodology and Limiting Conditions

A site visit by Aaron Woods and Brianne Murdock of Horrocks Engineers to the subject property was made on March 20, 2023. Weather conditions were poor during the site visit, but there were no limiting factors for observation of the majority of the Subject Property. The survey was broken out into four (4) separate divisions for the purposes of the documentation. Property 1 is the agricultural area in the southeast portion of the Subject Property (Tax ID No. E-014400-0005-0000). Property 2 is the eastern residential property (Tax ID No. E-0172-0001-0000). Property 3 is the western residential property (Tax ID No. E-0172-0001-0002). The remainder of the property north of these three areas was not walked due to limited access and poor weather and only viewed from the other areas of the Subject Property.

Other than the information provided and described herein, no other records, waste manifests, or tank inventory information were obtained or readily available to the environmental assessment team. In addition, no records, reports, anecdotal reports, or other evidence of catastrophic spills, releases, fires, or explosions were provided or obtained.

2. Physical Setting

In general, the Subject Property is fairly flat, with a slightly higher elevation to the northwest. This property is situated in a flat field. The surrounding area is also flat, resembling a playa or plain. Some small foothills are located to the west of this site, but these do not affect the topography of this property.

The Subject Property is bounded on the entire eastern edge by a Union Pacific Railroad line and the entire western edge by Iron Springs Road. The Subject Property is bordered by vacant open land and on the south by agricultural property. The adjacent property to the east is vacant land and on the southwest is a residential subdivision. There is a small parcel of land in the midst of the Subject Property just north of the two residential properties that is excluded from the Subject Property and is listed as being owned and operated by the Central Iron County Water Conservancy District.

Property 1

Property 1 consists of two dormant corrals, two outbuildings (a well pump house and a stable), and a cattle pond/tank. Property 1 is bordered by dirt roads and one main graveled haul road established by construction activities to the northwest of the project.

Two corrals were noted. The first is a wooden corral with metal corral fencing gates. There is a wooden calf chute on the western side of the corral. The other corral is more of a staging area with several large, square bales of hay stacked high. There was no evidence that livestock have been kept in this larger corral. It is entirely made of metal corral fencing.

Outbuilding One is wooden structure with a concrete foundation. There are two large wooden doors on the south and north faces of the structure. This structure is connected to local powerlines to provide electricity to the pump turbines to control the well. There are two turbines and an Acme Transformer on the south side of the structure bolted to railroad ties resting on the

concrete foundation. The north side of the structure is divided from the south side by a piece of plywood on which are mounted three ASCO transfer switch boxes.

Outbuilding Two is a typical livestock stable with two stalls. It is made of wood and covered with a wooden, plywood roof.

Property 2

Property 2 consists of a residential structure with one main house, a small wooden shed, a camper trailer, an aluminum shed, and two large shipping containers. Property 2 is bordered by dirt roads and one main graveled haul road established by construction activities to the northwest of the project.

Four buildings were noted. Building one is a well-cared for residential structure. Building two is a small “log-cabin” style structure which appears to be a shed or storage of some sort. It is wired for electricity and has a window unit air conditioner. Building three is an aluminum shed with sliding doors. Building four is another aluminum shed with some open wire mesh walls. It may have been an animal pen or stable, but is now used for storage. Two large shipping containers were also noted.

Property 3

Property 3 consists of a residential structure with one main house, one shed, one pump house, and one structure which may have been an attempted residential structure or work building with plumbing and electrical wiring. It appears to be primarily residential in nature.

Four buildings were noted. One main residential structure, one work shed, one pump house, and one animal stable which may have been converted into a partial residential area as a toilet had been installed in the building. Property 3 is bordered by dirt roads and one main graveled haul road established by construction activities to the northeast of the project.

3. Hazardous Substances and Petroleum Products

Property 1

- Plastic gas can (mostly empty).
- 1 above-ground propane tank (listed again in Section 5).

Property 2

- One above-ground propane tank in Building Four (listed again in Section 5).
- One external above-ground propane tank for the house (listed again in Section 5).

Property 3

- None noted.

4. Waste Generation, Storage, and Disposal

Property 1

- Four (4) metal drums and one (1) aluminum garbage can were noted in Corral 2. They appear to be empty. Some had holes in the top due to rust and sounded like they had some rainwater in the bottom.
- No septic noted.

Property 2

- Septic tank for house, which tenant stated was regularly serviced with no issues.

Property 3

- Believed to be a septic tank but not located.

5. Storage Tanks

Property 1

- One above-ground propane tank
- One rectangular metal water storage tank noted by the well pump house (mostly empty).
- Earthen cattle-watering tank in a pit.

Property 2

- One above-ground propane tank in Building Four.
- One external above-ground propane tank for the house.

Property 3

- One blue fiberglass well tank in the pump house (believe to be part of a well system).

6. Oil-Containing Equipment and Polychlorinated Biphenyls (PCBs)

Polychlorinated Biphenyls (PCBs) are a chemical component of dielectric fluids, coolants, or lubricating oils used in many types of equipment manufactured prior to 1979. Other equipment that may potentially contain PCBs includes hydraulically operated equipment, such as elevators, compaction equipment or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). Based upon the date of construction, no potential PCB-containing equipment was identified at the Subject Property.

Property 1

One well for the purpose of watering livestock.; one well valve/electric pump mechanism in Structure 1.

Property 2

The shipping containers appeared to have some sort of climate control electrical wiring and the A/C window unit in Building 2 and the central air for Building One may contain PCBs. A furnace was noted and photographed in the laundry room of the house. There is also a window unit air conditioner, as well as centralized air for the house.

Property 3

A swamp cooler was noted on the western portion of the house.

7. Additional Site Conditions

Table 5 is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Relevant and representative site photographs are included in Appendix 2. These photographs were taken on March 20, 2023.

Table 5. Additional Site Conditions

Condition	Identified?
Interior Drains, Trenches, or Sumps	The laundry room had a drain in the floor (Property 2)
Interior Stains or Corrosion	None
Unusual Odors	None
Interior Pools of Liquid	None
Stained Soil or Pavement	None
Stressed Vegetation	None
Indications of Inappropriate Solid Waste Disposal	Uneven landscape with one buried pit. PVC pipe sticking out of pit (Property 3)
Exterior Pits, Ponds, or Lagoons	Earthen cattle-watering tank in a pit (Property 1)
Wastewater or Stormwater Discharge/Disposal	None
Oil-Water Separators or Clarifiers	None
Septic Systems or Cesspools	Septic tank noted (Property 2) and believed but not located (Property 3)
Wells (Drinking Water, Monitoring, Agricultural or Irrigation, or Process Water Wells)	One well for the purpose of watering livestock.; one well valve/electric pump mechanism in Structure 1 (Property 1). One blue fiberglass well tank in the pump house (Property 3).
Petroleum or Natural Gas Pipelines/Easements	None

VII. Interviews

Interviews were conducted with the following individuals:

- **Ryan Obray with Building Zone Industries, acting as an agent of User for the development of the Subject Property:** Interview was conducted on February 23, 2023 via telephone conference. Mr. Obray indicated that Commerce Crossroads Logistics Park, LLC is the developer for the Subject Property and that Iron Apex Holdings LLC is the owner of the parcels that constitute the Subject Property. To his knowledge and information, the Subject Property has historically been used for agricultural and grazing purposes, with a couple of houses individually situated on 20-acre parcels. These two houses are currently being leased under short-term leases and are currently occupied by people who do not have historical knowledge of the uses of the property. Portions of the property are still currently leased to Devar Bullock for agricultural production, with a center pivot, small sheds/pens, and other small agricultural improvements. He stated that he has had opportunities to survey/view the Subject Property and has not seen any indications of hazardous waste contamination. He did find an abandoned couch next to an old fire pit, but no indicia of illegal dumping or other types of evidence of potential contamination. He stated that he was not

aware of any environmental liens or AULs against the Subject Property and that the only restrictions on the property were current zoning (since the land is zoned as agricultural and light industrial). He stated that he understood that the parcels had been purchased for fair market value. He also provided contact information for other past owners/occupants that could be contacted and that he would help facilitate survey of the property and the structures on it.

- **Devar Bulloch:** Interview was conducted on February 24, 2023 via telephone. Mr. Bulloch is currently leasing portions of the Subject Property for farming operations and has been for the last 4-5 years. He stated that his operation consists of growing alfalfa grass hay and grazing for cattle, with pasture ground for cows 60-70 head (but not all of the cows are always on the property), a 40-acre pivot line, a haystack, a 10x10 well housing for irrigation water for the pivot line, and a 3-sided shed. He stated that he uses tractors and other typical farming equipment for the agricultural production but that he refuels his equipment off-site and drives into the property. He stated that the pivot line was installed prior to his leasing of the property and that it was installed by his relatives who previously had the use of the property prior to this. Their use of the property goes back approximately 30-40 years, with the pivot line installed about 25 years ago.
- **Shem Jessop:** Interviewed on February 27, 2023 via telephone. Mr. Jessop was a prior owner/occupant of certain portions of the property (Parcel E-0172-0001-0000). He stated that he owned the property for approximately 2 years and that he did not remember from whom he purchased the property. He resided in the residence and used the property as a staging area for construction purposes, including construction equipment (like forklifts, etc.), lumber, and other such items. He stated that he did not refuel equipment on the property or have any above or underground tanks for refueling purposes. He stated that he was not aware of any hazardous waste contamination on the property.
- **Jason Brewer:** Messages were left on a voicemail for Mr. Brewer, but no interview was able to be conducted.

VIII. Findings

Based upon the information obtained in the preparation of this ESA, the presence or likely presence of some minor levels of hazardous and/or petroleum products are present on the Subject Property in connection with the residential and agricultural areas (i.e., namely, the small above-ground propane tanks, water well pumping equipment, air conditioner/swamp coolers, etc.). The pumps and propane tanks are in use and maintained and there is no other evidence of the potential for a likely release of hazardous substances to the environment.

No evidence of hazardous material contamination or a release to the environment has been identified and the items identified do not appear to pose a material threat of a future release to the environment due to ongoing maintenance of the above-ground tanks/equipment. The Subject Property has been used for agricultural and/or residential purposes only, as well as the adjacent properties.

IX. Opinion

Based upon the information obtained in the preparation of this ESA, no RECs are believed to exist on the subject property; therefore, there would be no impact on the subject property.

X. Conclusions & Recommendations for Additional Investigation

Additional assessment or investigation is not warranted for the site.

"We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the subject property. Any exceptions to, or deletions from, this practice are described herein. With the exception of the items listed in the Findings section herein, this assessment has revealed no evidence of RECs in connection with the property."

XI. References

The following reference documents were used and/or cited in the performance of this ESA:

- a. ASTM E1527-21: "Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process, 59 p.

XII. Qualifications of the Environmental Professional

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 02/03/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 02/02/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/27/2022

Next Scheduled EDR Contact: 04/24/2023
Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/27/2022	Source: EPA

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: 303-312-6149

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: 303-312-6149
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: 303-312-6149

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: 303-312-6149

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/02/2022	Source: Department of the Navy
Date Data Arrived at EDR: 11/08/2022	Telephone: 843-820-7326
Date Made Active in Reports: 01/10/2023	Last EDR Contact: 02/03/2023
Number of Days to Update: 63	Next Scheduled EDR Contact: 05/22/2023
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/15/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/17/2022	Telephone: 703-603-0695
Date Made Active in Reports: 10/24/2022	Last EDR Contact: 11/16/2022
Number of Days to Update: 68	Next Scheduled EDR Contact: 03/06/2023
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

Date of Government Version: 01/03/2022	Source: Environmental Protection Agency

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Provider List

Source: Department of Health

Telephone: 801-538-9299

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

UTAH GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Wetlands Data: Wetland Inventory

Source: Utah Geological Survey

Telephone: 801-537-3300

Water Rights Database

Contact: Judy Imlay

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Horrocks Engineers were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

Appendix 4: Qualifications of the Environmental Professional

This work was directed, developed and/or generated by Stan Jorgensen, P.E. Stan is a Professional Engineer with over 20 years of experience in all aspects of public/private transportation, and municipal projects. He is skilled in, and qualified to direct, the preparation of environmental permits and clearances, reporting requirements, public involvement, field assessment, and site inspection. He has been involved with numerous Phase 1 Environmental Site Assessments following ASTM standards.

EDUCATION

B.S. – Civil Engineering (Brigham Young University)

M.S. – Civil Engineering (Brigham Young University)

AREAS OF EXPERTISE AND PROFESSIONAL AFFILIATION

- American Society of Civil Engineers (ASCE)
- American Council of Engineering Companies (ACEC)
- NEPA professional
- Environmental Compliance and Agency Coordination

Mr. Jorgensen’s qualifications and relevant experience meet the definition of “environmental professional,” as defined by ASTM E1527-13, pursuant to 40 CFR 10.

Mr. Jorgensen directed a document preparation team that included:

- Judy Imlay (interviews and records reviews, report preparation)
- Aaron Woods (site visit)
- Brianne Murdock (site visit)
